THE INSPIRE PROGRAM

Does your child love gymnastics and is looking for an extra challenge? Try our Inspire Program!

The Inspire program is the next step up from our GymFun and GymSkills programs which offers further development of gymnastics skills while still remaining in a fun, non competitive environment.

Inspire is our bridging program between recreational and competitive gymnastics. In smaller classes your child will develop the strength, flexibility, coordination and movement required to complete harder skills.

The Inspire Program is the best way to nurture your child's love of gymnastics while still remaining non competitive.

HOW DOES INSPIRE WORK?

Inspire works through 4 stages to progress your child in their gymnastics journey. Children will start in stage 1, learning all the necessary skills and routines for our in house display day.

This display day serves as an opportunity for children to show case their skills and give them exposure to performing in front of people. Children that show competent and confident performances and skills will upgrade to the next stage.

There will be two in house display days per year to give everyone an opportunity to show off their hard work! These usually take place in the last few weeks of terms 2 and 4. Participation in the display days are essential for athletes looking to move up a stage.

Enrolments can be done online, in person or over the phone. Any questions and inquiries can be sent to cat@blackwoodrec.com.au.
